# Orka King Crab

The Orka King Crab is a highly specialized crayfish-style soft lure engineered specifically for high-impact bottom fishing. Designed to trigger aggressive reactions from passive or cautious predators, its lively, irritating movement perfectly mimics vulnerable freshwater prey. When paired with a stand-up jig head, the King Crab locks into a highly visible, aggressive "attack position" the moment it contacts the floor—making it a mandatory weapon for zander, perch, and bottom-hugging pike.
